Software Engineer with 5+ years of experience in back-end development, currently building banking solutions at BNP Paribas with Java and Spring Boot. Proven track record across banking, government and industry, working with modern standards (Java 17, Jakarta EE) and advanced data handling. Complementing practical experience with a Master's in Computational Engineering and Mathematics.

Experience

Java Software Engineer | BNP Paribas Securities Services (Outsourcing – HN Services) (Lisbon, Hybrid) (May 2026 – Present)

- Developing and maintaining back-end features for banking systems using Java (17 and 8), Spring Boot 3 and JEE, applying design patterns such as MVC, Decorator and Facade.
- Performing technical analysis of new features raised during Sprint Planning, in a fully Agile environment (Daily, Planning, Iteration Review, Retrospective).
- Contributing to code quality through code reviews, pair programming and cross-testing of features developed by other team members.
- Supporting alignment between the Scrum Master and the development team and collaborating with other teams on shared development efforts.
- Key technologies include **Java 8/17, Spring & Spring Boot 3, JEE, SQL, Apache Tomcat 8, GitLab, IntelliJ IDEA, Eclipse**

Java Software Developer | Xplain Iberica S.L. (Madrid, Hybrid) (Oct 2025 – May 2026)

- Developed secure and high-performance backend services for Government & Public Security solutions (Justice, Police, Migration).
- Built robust Odoo ERP interfaces, creating seamless backend integrations to synchronize complex business data between the core case management system and external resource modules.
- Engineered advanced, type-safe search capabilities using QueryDSL and Jakarta Persistence (JPA), enabling highly dynamic filtering across complex relational datasets.
- Managed database schema evolution and version control using Flyway and Microsoft SQL Server, ensuring consistent deployments across development and production environments.
- Key technologies included **Java 17, Spring Framework 6, QueryDSL 6, Microsoft SQL Server, Hibernate 6, Flyway, Odoo, SOAP, IntelliJ IDEA, JUnit 4, SVN**

IT Specialist | The Navigator Company (Lisbon, Hybrid) (Jul 2024 – Sep 2025)

- Responsible for developing and maintaining backend services for a large-scale, distributed enterprise system, collaborating with internal teams and coordinating with external suppliers to ensure seamless integration and support.
- Driving projects from conception to implementation, analysing requirements, and translating stakeholder expectations into robust technical solutions.
- Analysis and optimization of business processes through automation, resulting in significant improvements to workflow and operational efficiency.
- Collaborating with cross-functional teams, mediating between business and technical stakeholders, and managing functional testing to ensure high-quality deliverables.
- Key technologies include **Informix 4GL, SQL, GitLab, Shell Script, Jira, Linux, Python, Querix, REST.**

Java Software Developer / Configuration Manager | BNP Paribas Securities Services (Outsourcing – HN Services) *(Jun 2021 – Jul 2024)*

- Developed new features and optimized data access services for a high-volume, mission-critical enterprise application using Java, Struts, and Sybase/T-SQL within an agile team.
- Managed Git strategies, software deployment, and cross-team collaboration. My focus on process improvement led to more stable builds with fewer regressions, faster release cycles, and a significant reduction in merge conflicts.
- Key technologies included **Java 8, Sybase/T-SQL, Struts, GitLab, Jira, SonarQube, Confluence, Jenkins, JasperReports, JSP, Maven, WebSphere, JavaScript.**

Junior Java Developer | CTT – Portuguese Post Office (Outsourcing – CodeForAll) *(Aug 2020 – Jun 2021)*

- I contributed to software development and maintenance in a waterfall team, raised code quality standards, and helped exceed production targets.
- Key technologies included **Java 8, Java 11, JavaScript, Spring, Struts, SQL Server, Oracle, Azure DevOps, Gitlab, SVN, JUnit, Mockito.**

Production Team Lead | Euro-Yser – Chemical Products *(2018 – 2020)*

- I managed daily operations, ensured safety compliance, and optimized workflows for greater efficiency.

Quality Assurance Manager | Euro-Yser – Chemical Products *(2013 – 2018)*

- I established quality standards that improved product reliability and led a team to consistently meet production goals.

Process Engineer | Euro-Yser – Chemical Products *(2010 – 2013)*

- Optimization of business processes with a focus on improving performance and reducing costs.

Skills

Programming Languages:

Professional Experience: Java, SQL, Shell Script, JavaScript, Informix 4GL

Academic & Foundational: Python, C/C++, Rust, Go

Frameworks & Technologies: Struts, Spring, QueryDSL, JPA, Flyway, Odoo

Tools & Platforms: Git, GitLab, SVN, IntelliJ, Jenkins, Jira, Confluence, Linux, Agile, Scrum, Waterfall

Languages: **Portuguese** (Native) | **English** (Advanced) | **Spanish** (Advanced) | **German** (Beginner)

Other Skills: Requirement Analysis, Business and Process Modeling, Quality Assurance, Operational Control, Cross-Team Collaboration

Education

Master in Computational Engineering and Mathematics (60 ECTS)

Universitat Rovira i Virgili *(Sept 2025 - Present)*

Bachelor in Informatics Engineering (180 ECTS, Grade: 17/20 - A)

Universidade Aberta *(Sep 2021 – Jun 2024)*

Final Project: Developed a cell phone running tracking app using **Java** and **Spring Boot** to build a complete backend solution with REST APIs and data persistence.

Licentiate Degree in Chemical Engineering (300 ECTS, Grade: 14)

Universidade de Aveiro *(1999 – 2007)*

Full-Stack Programming Bootcamp (14-Week Intensive & Immersive)

<Academia de Código_> *(2020)*

Certifications

AWS Certified Cloud Practitioner

August 2025 | Validation Number: **e9b535696ad545a7aa5827b4a6002604**
